Subject: Dimock Costs

Den,
As of 3/23

The total START cost to date is \$601,710,44 - As you know most of this is associated with sampling. But not 100%. Some was spent on data review/management. These costs are being managed under 104b and are not part of the OSCs Removal Action ceiling

The total ERRS cost to date is \$250,381.83 - Again, most of this is associated with direct water supply. But some of this is associated with general command post costs, etc. which we use the ERRS contract to provide.
